Q: Is there an expiration date for the Hand Sanitizers?

A: The Bath Springs Hand Sanitizer with Pump (1L) is safe to use for **2 years** post-purchase.

Q: How long does it take the UV Sanitizer to sanitize my device? How powerful is the UV light?

A: The Blu Element UV Sanitizer eliminates up to 99% of bacteria in approximately **6 minutes** with its powerful UV light technology (**360°C**). It is the perfect solution to disinfect your phone, keys, watch or even your jewelry. This product has a compact size and low voltage (5 volts).

Q: How can I turn off the UV Sanitizer if I am finished with it?

A: There are 3 ways to turn off the UV Sanitizer:

- 1) Keep the lid open after you finished disinfecting your phone
- 2) Unplug the device after you finished disinfecting your phone
- 3) Close the lid after you finished disinfection your phone. The sterilizer will restart the sterilization process but will be turned off after 5-6 minutes. You are not required to unplug the UV Sanitizer.

Q: Can I use the UV Sterilizer for two devices in a row?

A: Once you finish the first device disinfection process, you can open the lid and put the new phone into the sterilizer and close the lid. The device will automatically restart disinfection and will terminate the process in 5-6 minutes.

Q: What are the details of Cesium's charitable donations regarding this product category?

A: Cesium will be donating a total of 1000 masks to the Jewish General Hospital. In addition, 10% of the of the earnings from all masks and Blu Element UV Sterilizers sold on CesiumOnline to COVID Relief.
